Installation  
video guide

## Before you start.

Carefully unwrap frame.

Check frame fits structural opening and that the door handing is correct.

Remove loose fitted architrave and door stops.

## STEP 1

Offer inner frame into opening and centralise. Level door frame head and clamp into position.

Fix head through pre-drilled holes on the architrave carrier to the structure, using suitable fixings.

Level and plumb legs, pack at fixing points, as necessary, and clamp.

Fix legs through the pre-drilled holes on the architrave carrier to the structure using suitable fixings.

## STEP 2

Offer outer frame into position, pull tight against inner frame and clamp.

Fix head through pre-drilled holes on the architrave carrier to the structure, using suitable fixings.

Within opening, pilot drill through the predrilled holes in the outer frame into the inner frame.

Fix through holes into the structure using suitable fixings, ensuring the fixings are not over tightened.

## STEP 3

Door frame flipper seal should now be slid into the door stops.

Starting with head, clip doorstops to outer frame.

STEP 4

Lift door into frame to ensure clearance required are correct.

Starting with head, clip architraves to inner and outer frames.

STEP 5

A thin flat filling knife or similar can be used to remove fitted architraves and doorstops.
